

OptumRx Vigilant Drug Program

Clinical Duplicates strategy

Effective January 1, 2021

Thousands of medications are available today with even more entering the market — sometimes at a higher cost without additional value. OptumRx can help ensure that your pharmacy benefit dollars cover only the most clinically appropriate and affordable medications.

Clinical Duplicates strategy* — Excludes new medications with similar composition to existing medications with no additional advantage.

*Programs are also available for clients who prefer prior authorization rather than an exclusion strategy.
