

OptumRx Vigilant Drug Program

High-Cost Brands with Generics strategy

Effective January 1, 2021

Thousands of medications are available today with even more entering the market — sometimes at a higher cost without additional value. OptumRx can help ensure that your pharmacy benefit dollars cover only the most clinically appropriate and affordable medications.

High-Cost Brands with Generics strategy — Excludes higher-cost brand products when a clinically equivalent, lower-cost generic option is available.
