

OptumRx Vigilant Drug Program

High-Cost Generics strategy

Effective January 1, 2021

Thousands of medications are available today with even more entering the market — sometimes at a higher cost without additional value. OptumRx can help ensure that your pharmacy benefit dollars cover only the most clinically appropriate and affordable medications.

High-Cost Generics strategy* — Excludes higher-cost generic products when a lower-cost generic equivalent becomes available.

*Programs are also available for clients who prefer prior authorization rather than an exclusion strategy.
